EDUCATION

Bachelor of Technology (Computer Science) **Sep 2020 - April 2024**

N.K.Orchid Collage Of Engineering

Class 12th - HSC Board **Sep 2018 - Feb 2020**

D.B.F Dayanand Collage of Arts and Science

SKILLS

- **Languages and Tools:** Java, Python, C, C++, MySQL, Postgresql, JavaScript, HTML, CSS, React, NodeJs, Git, Electron, Docker, Postman.
- **Other Skills:** OOP, Debugging, Software Development, REST APIs, Web Development, Data Analysis, Algorithm Analysis, Database Management, API Design, Data Structures.
- **Course Work:** CNN, NLP, RNN.

EXPERIENCE

Data Analyst At Zidio Development **May-Aug 2024**

- Implemented the customer segmentation project which works on social media analysis.
- Emotion detection through voice.
- Live Digit Recognition using tkinter library and CNN.

Vpace Technologies **Aug-Nov 2024**

- Worked as a backend developer.
- As well as got a brief knowledge of frontend technologies.

PROJECTS

3rd Eye : Real Time Event Detection for Video Surveillance Applications (Python) **April 2024**

- The main focus of the project is to prevent critical fire incidents using real-time event detection.
- Collected a large dataset, filtered and cleaned the data, and performed data manipulation to prepare it for training.
- The data training process was conducted on Roboflow and Google Colab. For the backend, I utilized Flask to interact efficiently with the frontend.
- For the frontend, I used the ReactJs framework to handle files efficiently, simplify the code, and avoid repetition.

E-commerce website (Python) **Sept 2024**

- This project mainly focuses on the backend using the Django framework.
- The dataset for this project was sourced from Kaggle, and the data cleaning process was conducted in Google Colab.
- Extracted key features such as voting, rating, author name, and book name, which were essential for the recommendation logic.
- These features were then dumped using pickle and integrated into the Django backend for efficient handling and recommendation generation.

Shopease E-Commerce website (Java) **Dec 2024**

- Builted a Full-Stack E-commerce Website: Developed a feature-rich e-commerce platform using Spring Boot (backend) and React (frontend) for a seamless user experience.
- Implemented Secure Authentication: Integrated JWT authentication to ensure secure user login and session management.
- Developed Shopping Cart and Order Features: Designed and implemented a dynamic cart system and streamlined order placement with real-time updates.
- Optimized Performance and Scalability: Utilized RESTful APIs to enable efficient communication and scalability for handling high user traffic.

CERTIFIACTIONS

- Completed Python and Django Framework , HTML5 - Certificate
- Completed DBMS course - Certificate
- Completed C for everyone - Certificate

LANGUAGES

- **Profeciency** - English, Hindi, Marathi, Telugu.
