PROFILE SUMMARY

Software Engineer with 2+ years of professional experience designing and delivering scalable backend systems, RESTful APIs, and full-stack applications across Java, Python, and C#/.NET stacks. Proficient in Spring Boot, ASP.NET Core, microservices, JWT/OAuth security, and database optimization. Hands-on with AI/ML, LLM integration, and agentic AI tools (Cursor, GitHub Copilot, Claude Code). Passionate about building intelligent, production-grade solutions in agile environments.

TECHNICAL SKILLS

Languages: Java, Python, C#, C, C++, SQL, JavaScript
Backend & Frameworks: Spring Boot, ASP.NET Core (.NET 8), Web API, Django, Flask, FastAPI, MVC Architecture
CS Fundamentals: Data Structures & Algorithms, OOP Design, Microservices, REST APIs, Design Patterns, SDLC
Data Access & Databases: Hibernate, JPA, JDBC, EF Core, LINQ, ADO.NET, MySQL, PostgreSQL, SQL Server, MongoDB
Security & AI/ML: JWT, OAuth 2.0, RBAC | CNN, RNN, NLP, TensorFlow, scikit-learn, Pandas, LLM Integration
DevOps & Tools: Git, Docker, Azure DevOps, CI/CD, Postman, Swagger, Maven, Render
AI Dev Tools: Cursor, GitHub Copilot, Claude / Claude Code, Antigravity

EXPERIENCE

Software Engineer — LSL Technologies Pvt. Ltd. *Aug 2024 – Present*

- Designed and developed scalable backend services and RESTful APIs using Java and Python, applying OOP principles, microservices patterns, and clean architecture for production-ready systems.
- Collaborated with cross-functional teams in agile sprints to deliver, test, and deploy features end-to-end, optimizing database queries to improve system performance and reliability.
- Leveraged AI tools (Cursor, GitHub Copilot, Claude Code) to accelerate feature delivery, improve code quality, and streamline debugging across backend services.

Data Analyst (Intern) — Zidio Development *May 2024 – Aug 2024*

- Built ETL pipelines and segmentation models using Python, Pandas, and SQL with feature engineering, improving targeting accuracy by 15%.
- Developed CNN-based deep learning models for emotion detection and digit recognition using TensorFlow with data augmentation and hyperparameter tuning.

PROJECTS

Smart Attendance System | *C#/.NET 8, ASP.NET Core, PostgreSQL, React* *Oct 2025 – May 2026*
Built an API-first attendance platform with EF Core, JWT auth, RBAC, QR onboarding, and time-based validation using dependency injection and clean architecture — React frontend deployed via CI/CD to Render.

Shopease E-Commerce Platform | *Java, Spring Boot, Hibernate, MySQL, React* *Aug 2024*
Scalable multi-tiered e-commerce platform using Spring Boot, Hibernate/JPA ORM, and JWT-secured REST APIs for high-volume transactions — optimized MySQL queries and validated with Postman and unit testing.

HR Recruitment Portal | *C#/.NET 8, ASP.NET Core, PostgreSQL* *Sep 2025 – Oct 2025*
Role-based MVC portal in C# with service-based architecture, JWT auth, and optimized PostgreSQL queries for Admin, HR, and Candidate workflows — deployed to Render via CI/CD.

3rd Eye — Real-Time AI Event Detection | *Python, Flask, CNN, TensorFlow, React* *Apr 2024*
End-to-end AI fire detection system with CNN/TensorFlow model, Flask REST API backend, and React frontend — full lifecycle ownership from data pipeline to production deployment.

EDUCATION

Bachelor of Technology (Computer Science) *Jan 2021 – Jul 2024*
N.K. Orchid College of Engineering & Technology, Solapur, Maharashtra | GPA: 7.72

Higher Secondary School (Science) *Jul 2018 – Feb 2020*
D.B.F. Dayanand College of Arts & Science, Solapur

CERTIFICATIONS & SOFT SKILLS

Java Assessment | Python & Django Framework, HTML5 | DBMS | C for Everyone | TCS iON Career Edge
Problem Solving | OOP Design Thinking | Agile Collaboration | Ownership & Accountability | Fast Learner | Attention to Detail
